

B RAVI TEJA

Python Full Stack Developer | Django & React.js | REST APIs

Email: raviteja46h9@gmail.com

Phone: +91-9490176281

LinkedIn: linkedin.com/in/ravi-teja-b | GitHub: github.com/ravi05H9

PROFESSIONAL SUMMARY

Full-stack developer with hands-on internship experience delivering full-stack MERN applications, plus project experience building web applications with Python (Django) and React.js. Shipped 3+ full-stack apps with RESTful APIs, cutting backend response time 35% through MongoDB optimization. Strong foundation in Python, JavaScript, React, and Agile delivery — ready to contribute from day one as a Full Stack Developer.

EDUCATION

B.Tech, Computer Science & Engineering

St. Ann's College of Engg. & Technology

Aug 2022 – May 2026

Intermediate (MPC)

Sri Vignani VGRM College

2020 – 2022

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, HTML5, CSS3

Frontend: React.js, Responsive Web Design

Backend: Django, Django REST Framework, REST APIs, CRUD, Authentication

Databases: MySQL, MongoDB

Cloud & DevOps: AWS, GitHub Actions, CI/CD, Docker

Tools: Git, GitHub, VS Code, Postman, Linux

Core Concepts: OOP, Data Structures & Algorithms, SDLC, Agile/Scrum

EXPERIENCE

SmartBridge & APSCHE

Full Stack Development Intern

Remote, Andhra Pradesh

Jun 2025 – Aug 2025

- Engineered and deployed 3+ full-stack MERN applications end-to-end, building RESTful APIs and responsive React.js UIs that cut feature delivery time by ~20%.
- Optimized MongoDB performance through indexing and aggregation pipelines, reducing backend response time by ~35% under production-like load.
- Implemented JWT authentication across 4+ modules, securing user and admin workflows.
- Drove full Agile/Scrum delivery — sprint planning, daily stand-ups, and peer code reviews — meeting 100% of sprint deadlines.

KEY PROJECTS

AI Doctor — AI Healthcare Platform | React, Python (Django), MongoDB, Claude API

- Architected a full-stack healthcare platform with 7 modules — AI symptom analysis, AI chat, doctor discovery, appointments, medication tracking, recovery logs, and PDF report analysis — powered by 10+ REST APIs secured with JWT; deployed on Replit.

LearnHub — E-Learning Platform | Python (Django) + React

- Designed 15+ REST APIs with optimized MongoDB schemas and server-side pagination, reducing data-fetch time by 40% at scale.

Blockchain Secure Access Control System | Ethereum, Solidity, AES

- Built a decentralized crowdsensing platform using Ethereum smart contracts and AES encryption, eliminating single-point-of-trust vulnerabilities for 100+ simulated users.

Job Portal Web Application | Python (Django), Bootstrap

- Developed a job portal serving 200+ listings with multi-criteria search APIs and dedicated employer/applicant dashboards on a responsive Bootstrap UI.

CERTIFICATIONS

- Full Stack Development – MERN, SmartBridge (2025)
- Internet of Things, NPTEL / IIT (2024)
- Cyber Job Simulation, Deloitte (2024)
